DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 32 drawn to a query execution, classified in class 707, subclass 3.
- II. Claims 33-34 drawn to code sequence generation, classified in class 707, subclass 102.

Inventions I, and II, are related as combination and subcombination respectively.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (I) as claimed XPATH query execution does not require the specific method of generating a flattened code sequence as claimed in subcombination (II).

Subcombination (II) the method of generating a flattened code sequence as claimed has separate utility by itself or with other combination does not require the particular combination as claimed in combination (I) of XPATH query execution for patentability. Therefore, the inventions are distinct; however, they could be usable together.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2164

Because these inventions are distinct for the reasons given above and the search required for I is not required for II, respectively, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

telephone calls was made to Rick Nydegger on 8/3/06 and 8/7/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2164
